DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a device for assembling a pneumatic booster.

Group II, claim(s) 9-12, drawn to a method of swaging a booster.

Group III, claim(s) 13, drawn to a pneumatic booster.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: In accordance with the guidance set forth in MPEP section 1850, it has been determined *a posteriori*, i.e., after taking the prior art into consideration, that the features common to all the claims do not constitute "special technical features" since they do not make a "contribution" over the prior art in light of at least Kostermeier (5,107,579), for example.

Specifically, it is noted that the features which are common to all of the claims are as follows: fixed cylindrical support, a cylindrical cap, set of rollers, and a motor for rotating the rollers.

Note that Kostmeier teaches a device having a fixed cylindrical support (2'), a cylindrical cap (3'), and a set of rollers (42, 43). Note a motor for rotating rollers is conventional and well known.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
